

REGULAR PAPERS ISSUE

- 2204 Wireless Network Intelligence at the Edge**
By J. Park, S. Samarakoon, M. Bennis, and M. Debbah
 | CONTRIBUTED PAPER | This article explores the key building blocks of “edge-ML,” which offers distributed, low-latency, and reliable machine learning at the wireless network edge.
- 2240 Soft Information for Localization-of-Things**
By A. Conti, S. Mazuelas, S. Bartoletti, W. C. Lindsey, and M. Z. Win
 | INVITED PAPER | This article aims to establish the use of soft-information-based methods for Localization-of-Things and to quantify their performance gain with respect to classical ones.
- 2265 An Overview of the Development of Antenna-in-Package Technology for Highly Integrated Wireless Devices**
By Y. Zhang and J. Mao
 | CONTRIBUTED PAPER | This article provides an overview of the development of Antenna-in-Package technology and makes recommendations for future research directions.

DEPARTMENTS

- 2202 SCANNING THE ISSUE**
- 2281 SCANNING OUR PAST**
 Standardization of the Ohm as a Unit of Electrical Resistance, 1861–1867
By P. M. Grant and J. S. Thompson
- 2290 FUTURE SPECIAL ISSUE/SPECIAL SECTIONS**

On the Cover:
 Our cover this month features one of the many high-stake applications, namely virtual reality, which necessitates distributed, low-latency, and reliable ML at the edge.
