

# IEEE Internet Computing

## 5 GUEST EDITORS' INTRODUCTION Future of HPC

Rosa M. Badia, Ian Foster, and Dejan Milojicic

JANUARY/FEBRUARY 2023

### Theme Articles

7

Codesign for Extreme Heterogeneity: Integrating Custom Hardware With Commodity Computing Technology to Support Next-Generation HPC Converged Workloads

James A. Ang, Kevin J. Barker, Draguna L. Vrabie, and Gokcen Kestor

16

The Future of HPC in Nuclear Security

Galen M. Shipman, Jason Pruet, David Daniel, Josh Dolence, Gary Grider, Brian M. Haines, Aimee Hungerford, Stephen Poole, Tim Randles, Sriram Swaminarayan, and Chris Werner

24

Confidential High-Performance Computing in the Public Cloud

Keke Chen

## Feature Articles

- 34** Green Planning Systems for Self-Consumption of Renewable Energy  
Soteris Constantinou, Andreas Konstantinidis, and Demetrios Zeinalipour-Yazti
- 43** Cloud-Edge-End Cooperative Detection of Wind Turbine Blade Surface Damage Based on Lightweight Deep Learning Network  
Yajuan Liu, Zhen Wang, Xiaolun Wu, Fang Fang, and Ali Syed Saqlain
- 53** Web-Based Solutions for Communication and Knowledge Management in Disaster Situations  
Benjamin Barth, Govinda C. Kabbinahithilu, Juan Marchal, Tomaso de Cola, Monika Friedemann, and Joseph Muna

## Departments

- 61** **Internet of Things, People, and Processes**  
Toward Building Edge Learning Pipelines  
Anastasios Gounaris, Anna-Valentini Michailidou, and Schahram Dustdar
- 70** **Internet Governance**  
On the Development of AI Governance Frameworks  
Virgílio Almeida, Laura Schertel Mendes, and Danilo Doneda
- 76** **Internet Ethics**  
Democratic Wireless Channel Assignment: Fair Resource Allocation in Wi-Fi Networks  
Ivan Marsa-Maestre, Jose Manuel Gimenez-Guzman, Marino Tejedor-Romero, Enrique de la Hoz, and Pradeep Murukannaiah
- 81** **Knowledge Graph**  
Knowledge Graph Empowered Machine Learning Pipelines for Improved Efficiency, Reusability, and Explainability  
Revathy Venkataramanan, Aalap Tripathy, Martin Foltin, Hong Yung Yip, Annmary Justine, and Amit Sheth
